Thomson Reuters and FinTech niiio launch regional partnership

Görlitz / Rakoczi, 13th of December, 2017

Thomson Reuters and the FinTech company niiio finance group AG enter a partnership as part of regional blue-chip partnership initiative with focus on digital financial services industry software solutions. The aim is to provide banks and asset managers with product and service elements for the digital transformation of their individual business models.

Smart plug-and-play banking or a complete redesign of digital asset consulting? The theme of digital transformation is becoming increasingly important and is driving strategic development of completely new business models. Against this backdrop, Thomson Reuters and niiio finance group AG have joined forces to foster integration of niiio software solutions in Thomson Reuters Datascope Select to facilitate more effective go to market for joint clients from financial services industry. Besides API-banking tools, Blockchain solutions and portfolio management system software, the primary focus is on Robo-Advisory white label software.

Johann Horch, Chairman of the Board of niiio finance group AG, says “This is the foundation of a successful partnership. Together, niiio and Thomson Reuters are following a strategy of creating added value for digital banks and asset managers.” Mario Uhl, Chairman of the supervisory Board of niiio finance group AG, a former SAP executive, adds “Combining our technology with Thomson Reuters’s powerful and far-reaching international presence means that together we can extend the reach of our most advanced technology.”

For the first time the partners did present their alliance on Thomson Reuters customer event Swiss Innovation Summit on November 16th 2017 in Zurich, a forum for Compliance and Investment professionals. niiio finance group AG did appear in Zurich as expert panelist as well as exhibitor.

About niiio finance group AG (WKN: 694610 - ISIN: DE0006946106 - ticker symbol: niio)

Digital services for the digital future of banking – that is niiio finance group AG’s speciality. In addition to the robo-advisor, these services include a community platform and API banking tools, as well as tailored consulting and development services and operating models. The Görlitz-based software publisher sees itself as a solution partner for banks and financial service providers. Its high-quality, plug-and-play solutions are user-friendly and customisable; they help to sink costs dramatically and to realise the benefits arising from competition.

Deutsche Software Engineering & Research GmbH (DSER) operates as the main shareholder of the corporate group. It was joined by niiio finance group in 2016, making a powerful team. Its goal is to provide a comprehensive fintech ecosystem that leads banks, consultants and private investors together into a digital future. DSER has been successfully providing solutions for the portfolio management market for over ten years. With its sophisticated core product (munio), over 80 active customers currently move 40 billion euros and manage a portfolio volume of around two million accounts.
